DD® FIREARMS OVERVIEW

NEW
DD4™ RIII™

p.16

RIII™
Our new RIII rifles feature a fully ambidextrous lower and our new RIS III rails. An ambidextrous lower provides right- and left-handed shooters with even greater flexibility and control, so they can operate important mechanisms without having to move or remove their dominant hand from the rifle's grip. RIS III rails feature M-LOK attachment for lighter weight while offering M203 grenade-launcher attachment. Versatile and reliable–undeniable.

DDM4®

p.24

DDM4®
They raised the bar with their introduction in 2009, and now DDM4 AR-style rifles are the standard by which all others are measured. This line of reliable semi-auto AR-style rifles comes in a variety of calibers (5.56, .300BLK, 6.8SPC), rail/attachment systems, barrel lengths (9-18"), finishes, and custom features that make them the right choice for tactical pros, home protectors, hunters, and sport shooters alike.

DD5®

p.42

DD5®
This highly accurate, super-reliable line of rifles builds upon the foundation we established in 7.62 AR-style rifles. New for 2022, is our 12.5" DD5 SBR chambered in 7.62. The rest of the DD5 line comes in three barrel lengths (16", 18" and 20") and three calibers (7.62, 6.5 Creedmoor and .260 REM), and with fully ambi controls, an adjustable gas block, and other features that contribute to making your time behind one an incredible shooting experience.

DELTA 5®

p.15

DELTA 5®
Accuracy is the name of the game with our DELTA 5 bolt-action rifles, available in .308 (20" barrel) & 6.5 Creedmoor (24" barrel). Enjoy all the attributes of a custom rifle right out of the box at a price point accessible to the average shooter. But average is not how you'll shoot with this long-range tack-driver. Accuracy. Guaranteed.

NEW
DELTA 5® PRO

p.8

DELTA 5® Pro
To improve on our DELTA 5 Pro design, we went smaller to better meet the needs of law enforcement and others who don't need a longer barrel for extreme long-range shots. Our new 16" barrel model, in .308 Win, and 18" barrel model, in 6.5 Creedmoor, both deliver the science of accuracy with a .5 SUB-MOA Accuracy Guarantee. Plus, their barrels are interchangeable.

THE DANIEL DNA

Building the best isn't something we try to do. Trying is for those who have the option to fail. We build the best because it's part of our DNA. We're genetically coded to make sure that every firearm and accessory stamped with the Daniel name is the absolute best it can be before it ever winds up in your hands. And once there, you'll feel the quality and workmanship—the Daniel DNA—all the way down to a molecular level.

BORN IN THE U.S.A.

Every Daniel firearm, part, or accessory is designed and manufactured right here in the U.S., in Black Creek, Georgia. American employees working American jobs to ensure that all of our products exude American quality. We're committed to providing excellence to our civilian customers looking for best-in-class items for home defense and recreational and competitive shooting. But we also support the military and law enforcement communities that protect our freedoms with top-tier firearms and accessories designed to get the job done and them home safely. Our support for Second Amendment rights is unwavering because without the teeth of the Second Amendment, there is no First Amendment…and no America as we know it.

FORWARD-THINKING DESIGN & SUPERIOR MATERIALS

If you're not pushing forward, you're standing still. Our product engineering continually extends boundaries and renders the status quo obsolete. But we don't design for design's sake. We take a customer-centric approach, always asking the question, "What are the features of this design that benefit the ones who will actually be using this product?" And even the best design in the world is useless if you bring it to fruition using inferior materials. So we build our forward-thinking-designed products out of only the finest materials. Things like ultra-high-strength stainless steel, aircraft-grade aluminum, carbon-fiber-reinforced polymers, and nickel superalloys.

PERFORMANCE-DRIVEN RELIABILITY

All of Daniel's products are designed and built first and foremost to perform and help you get the job done. Every time. So we take reliability and durability very seriously and test our products to try to purposely make them fail. They seldom do, but if one does, it's scrapped and doesn't make it out of our facilities. If we notice a pattern, it's back to the drawing board. And, since everyone's idea of performance isn't the same, and needs change over time, we manufacture our firearms with built-in upgrades and make them fully customizable. So no matter what you're looking to do, chances are we have the SKU for you.

PRECISION, STATE-OF-THE-ART MANUFACTURING

Most firearm "manufacturers" are content to simply assemble the parts made by other actual manufacturers—many located overseas. Not Daniel. We use state-of-the-art technology and robotics to manufacture our own parts. All of our barrels are made from proprietary steel and stainless steel alloys on GFM Radial Cold Hammer Forging machines. Over 90 CNC machines precision mill parts and components with exacting tolerances. Our high-performance DD WAVE sound suppressors are 3D printed using a direct-metal laser-sintering process. And once something is manufactured, we exercise industry-leading quality-control measures and technology—like utilizing coordinating measuring machines, optical vision systems, and in-house-designed specialty gauging to make sure every component meets or exceeds our demanding standards. Then, and only then, do our products make it into your hands. Because if we won't sign off on it, you don't sign for it.

ISO 9001:2015 Certified: After undergoing a rigorous qualification process that examined every department of the company, Daniel Defense was issued ISO 9001:2015 certification for quality management systems in 2020. This globally recognized certification demonstrates our dedication to achieving the highest levels of quality and ensuring that all of our products meet or exceed regulatory requirements–and customer expectations.

GUARANTEED LIFETIME PERFORMANCE

Daniel products are guaranteed for a lifetime. Not your lifetime—as a lot of manufacturers try to get by with—but the lifetime of the product. Because we design and manufacture our products to last and be appreciated and passed down through the generations. Which means it doesn't matter whether you're the first or fifth owner; we stand behind our product. And if you ever do have a problem, our Customer Service Team—American Daniel employees located in America—will be happy to assist you and make things right. Because we know our job doesn't end once a sale is made. As long as you're behind one of our products, so are we.

DELTA 5 PRO™

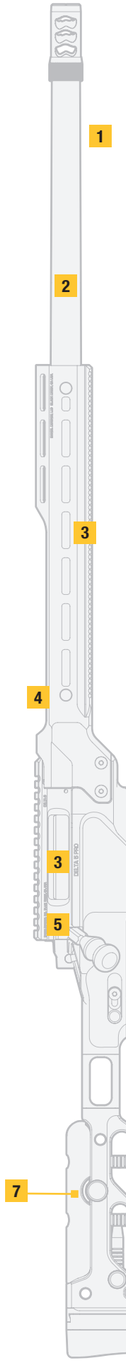

SUB·MOA
ACCURACY GUARANTEE

THE MOST ACCURATE PRODUCTION RIFLE IN THE WORLD.

Talk is cheap—including talk about how accurate a rifle shoots—so we're putting some real firepower behind our words. All Daniel Defense DELTA 5 rifles are guaranteed to shoot .75 MOA or less at 100 yards when used with quality factory match-grade ammunition. And all Daniel Defense DELTA 5 Pro rifles are guaranteed to shoot .5 MOA or less under the same conditions. We've done the work and the testing to back it up. It's not just talk; it's not bravado. It's science backed up by data. Data that says, "If we can do it, so can you." Guaranteed.

DELTA 5™ BOLT-ACTION RIFLES

1 SUB-MOA ACCURACY GUARANTEE

DELTA 5 Pro rifles are guaranteed to shoot .5 MOA or less at 100 yards (DELTA 5 .75 MOA) when used with quality factory match-grade ammunition

2 PROPRIETARY COLD HAMMER FORGED STEEL BARREL

Manufacturing processes paired with the highest-quality material to give you a lifetime of accuracy and durability. Modularity allows for barrels to be easily swapped to different calibers without needing a gunsmith

3 MODULAR, COMPETITION-READY CHASSIS

Upgraded features that ensure peak performance while eliminating the need for a gunsmith and the added cost of aftermarket parts

4 20 MOA SCOPE MOUNT/ SCALLOPED CUT

Less scope adjustment needed for greater long-range accuracy. Scalloped cut allows for lower height over bore even with scopes with large objective lenses

5 STAINLESS STEEL ACTION

Designed to function in all weather conditions, tighter tolerances in the action give you a more accurate and consistent performance. Patent-pending bolt stop allows for easy, snag-free operation while the three-lug bolt with 60-degree throw helps you get off more shots faster

6 TIMNEY ELITE HUNTER TRIGGER

Adjustable single-stage with two-position safety (1.5 - 4 lbs.)

7 FULLY ADJUSTABLE STOCK

Comb/Cheek piece is adjustable for height and yaw; controlled by knob/spring vise for easy adjustment and to hold the setting when released

NEW

DELTA 5™ PRO

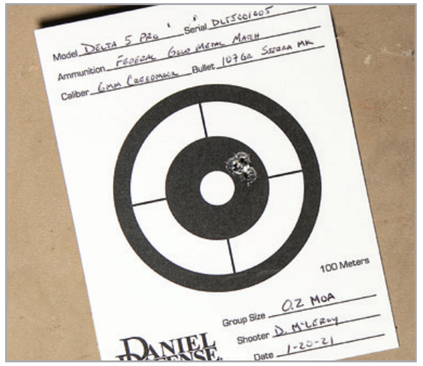

How do you improve upon the design of our winning DELTA 5 Pro rifles? By offering shorter barrels better suited for the needs of law enforcement and other users who don't need longer barrels to make extreme long-range shots. This year we're introducing two new models: one with a 16" barrel, chambered in .308 Win, and another with an 18" barrel, chambered in 6.5 Creedmoor. And the barrels on both are fully interchangeable, so you can swap barrels and change calibers with ease. Everything else is pure DELTA, including the fact they're guaranteed to shoot .5 MOA or less.

FULL-LENGTH ARCA RAIL
Integral to the chassis, the locking system extends the entire length of the forend; one-piece design increases rigidity on the RRS-compatible system

ULTIMATE MUZZLE BRAKE
Area 419 HELLFIRE Muzzle Brake features rearward-facing ports for the ultimate in recoil reduction and muzzle-rise mitigation

INTERCHANGEABLE BARREL
Forged to contour from a proprietary steel blend with a Cerakote finish. Replace barrels or change calibers with ease thanks to its modularity and proprietary barrel nut

ERGONOMIC THUMB REST
For maximum comfort and control. Left / Right adjustability to accommodate the user's preference

DELTA 5™ PRO

The ultimate package of performance, accuracy, and custom features rarely found on a production bolt gun. The DELTA 5 PRO bridges the gap between basic platforms and more expensive custom builds. Whether you're a casual weekend shooter or a seasoned competitor, this rifle will grow right along with your skillset because it's guaranteed to shoot sub half MOA. It's also one of the first production rifles to sport Area 419's ARCA Rail. But the one thing you won't find on this competition-ready rifle is a hefty competition price tag.

PRO CHASSIS SYSTEM
FOR DELTA 5® OR REMINGTON 700 ACTION

A competitive option for the current DELTA 5 bolt-action rifle with polymer stock. This chassis is a drop-in replacement for the DELTA 5 Stainless Steel Action and Cold Hammer Forged Barrel. Designed for long-range competition—specifically the PRS production class—integral features give users a professional chassis solution without the professional price tag. With innovative features like the adjustable thumb rest, integral ARCA Rail and user-adjustable buttstock, the PRO Chassis System will not disappoint.

FULLY ADJUSTABLE STOCK
Comb/cheek piece is adjustable for height and yaw; controlled by knob/spring vise for easy adjustment and to hold the setting when released

FULL-LENGTH ARCA RAIL
Integral to the chassis, the locking system extends the entire length of the forend; one-piece design increases rigidity on the RRS-compatible system

THUMB REST
Left/right adjustment allows users to set the desired position for optimal ergonomics

TRIGGER
Adjustable single-stage Timney Elite Hunter with two-position safety (1.5 – 4 lbs)

20 MOA SCOPE MOUNT
Compensates for bullet drop variance between the barrel and scope mount, therefore, less scope adjustment is needed for greater long-range accuracy

ADJUSTABLE STOCK
Out-of-the-box easy adjustability and comfort make it easy for shooters of all skill levels to achieve maximum performance and accuracy. Carbon-fiber-reinforced polymer construction ensures a lifetime of service

Designed with the user in mind, Daniel Defense has taken the modularity of the AR platform and integrated it into a one-of-a-kind bolt-action rifle. From an interchangeable cold hammer forged barrel to a user-configurable stock, the DELTA 5 features out-of-the-box customization that would normally require professional gunsmithing. For the user that expects more from their rifle, the DELTA 5 provides the ultimate long-range shooting experience from the day it's purchased. No custom wait time required. Barrel Conversion Kits available.

DELTA 5™

NEW

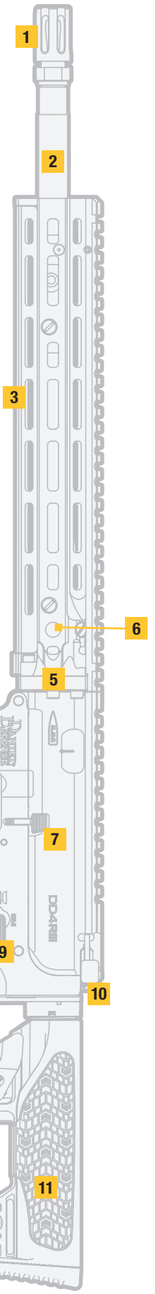

RIII™

BRINGING RII SOCOM LEGACY INTO THE FUTURE

To create our RIII family of rifles, we took the tried-and-true features that set our AR-15-style rifles apart from the competition and added two next-level enhancements: (1) a fully ambidextrous lower and (2) our new RIS III rail system. An ambidextrous bolt catch, magazine release, and safety selector provide right- and left-handed shooters with even greater flexibility and control, so they can operate these mechanisms without having to move or remove their dominant hand from the rifle's grip. Our RIS III rails—modeled after the revolutionary RIS II two-piece handguard developed for SOCOM—feature M-LOK attachment for lighter weight while still offering M203 grenade-launcher attachment. The result is a family of lightweight, ambidextrous, smaller-caliber rifles unlike anything we've offered before.

DD4™ RII™ NEXT GENERATION RIFLES

1 MUZZLE DEVICE

Manufactured from high-strength, corrosion-resistant 17-4 PH stainless steel, Daniel Defense Flash Suppressors are designed to eliminate flash associated with muzzle blast

2 COLD HAMMER FORGED

Intense hydraulic pressure process that forms the most accurate and longest-lasting barrels attainable

3 DETACHABLE LOWER RAIL

Lower section is removable without affecting the structural integrity, which allows the M203 grenade launcher (or HK M320 with adapters) to mount to the weapon system without interfering with the barrel harmonics

4 FLARED MAGWELL

Our widened and beveled magwell funnels magazines into place for the fastest, most secure reloads possible

10 GRIP-N-RIP® CHARGING HANDLE

Independently ambi charging handle with anti-gas features for a better shooting experience

6-BOLT BOLT-UP SYSTEM 5

Patented Bolt-Up System's 6-bolt design is battle tested and allows the rail system to free float the barrel, which will ensure barrel harmonics are not affected during operation

QD POINTS 6

Integral QD Points on each side near the receiver are flush and eliminate the need to install an aftermarket QD mount

FULLY AMBI CONTROLS

AMBI BOLT CATCH 7

Accessible on both sides of the receiver, gives right-handed shooters the ability to lock and release the bolt without having to remove their hand from the grip

AMBI MAG RELEASE 8

Mag Release is accessible on both sides of the receiver so the shooter does not have to break his/her shooting grip to reach the release

AMBI SAFETY SELECTOR 9

For right- or left-handed shooters

BUTT STOCK 11

Features a nonslip cheek weld, interchangeable butt pads, and an integrated QD point

M4A1 RIII.

How do you make our battle-tested M4A1 design even more operator friendly? We did so by adding a fully ambidextrous lower to provide right- and left-handed shooters with even more flexibility and control. We also replaced the RIS II Rail System with our new RIS III, which reduces weight by using M-LOK attachment instead of picatinny.

- Fully ambidextrous lower enables shooter to operate important rifle mechanisms without moving dominant hand from rifle grip
- 14.5" chrome-lined, heavy-phosphate-coated M4-profile barrel features a pinned & welded DD Flash Suppressor to extend length to NFA-required 16"
- 12.5" RIS III Rail features M-LOK attachment for lighter weight while accommodating M203 attachment

MK18

Carbine length gas system with pinned low-profile gas block for reliable cycling

10.3" chrome-lined, heavy-phosphate-coated Government-profile barrel provides outstanding maneuverability & durability

Equipped with the same Rail Interface System handguard chosen by USSOCOM for CQB operations around the world

This short-barreled rifle is unmatched in size, weight, and performance. The MK18 RIS II Rail System features the patented Bolt-Up attachment system and has been rigorously tested prior to fielding by USSOCOM. Class III dealers only; all NFA rules apply.

DD5®

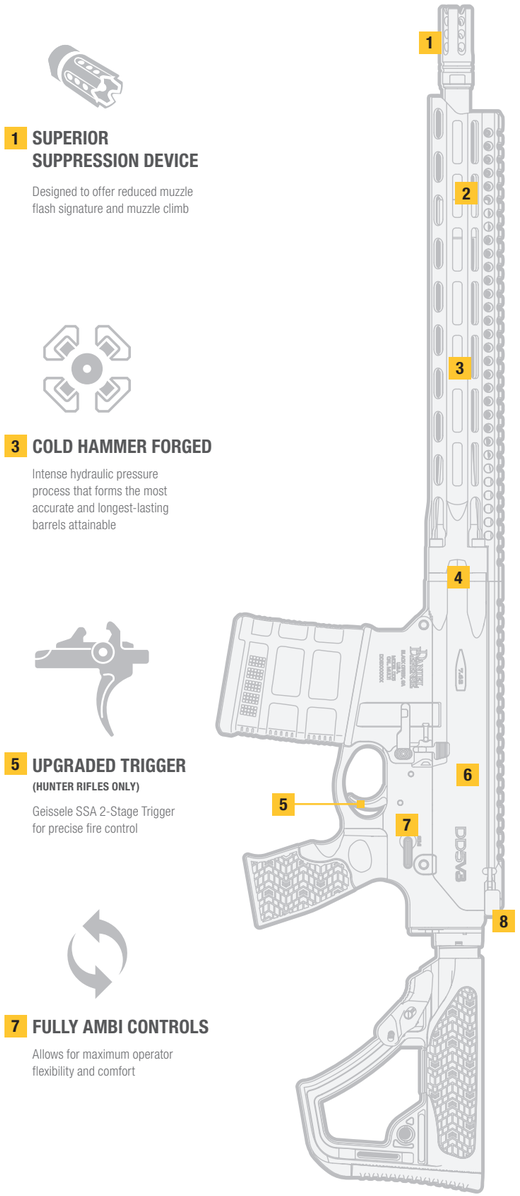

PERFECTING PRECISION

DANIEL DEFENSE® DD5® / 7.62, 6.5 Creedmoor & .260 Rem FIREARMS / These highly accurate and durable rifles come in three popular calibers and barrel lengths to provide even greater long-range precision shooting capability. Built with the legendary Daniel Defense commitment to quality, Isn't it Time You Got a Daniel?

DD5®

MODERN SPORTING RIFLES

1 SUPERIOR SUPPRESSION DEVICE

Designed to offer reduced muzzle flash signature and muzzle climb

2 ADJUSTABLE GAS BLOCK

Designed to provide consistent and reliable suppressed shooting

3 COLD HAMMER FORGED

Intense hydraulic pressure process that forms the most accurate and longest-lasting barrels attainable

4 INNOVATIVE 4-BOLT CONNECTION SYSTEM

Designed to ensure greater accuracy

5 UPGRADED TRIGGER
(HUNTER RIFLES ONLY)

Geissele SSA 2-Stage Trigger for precise fire control

6 SUPERFINISHED & DLC BOLT CARRIER GROUP

NEW

DD5 SBR

With a 12.5” barrel, an overall length of only 33”, and a weight of just 8.2 lbs., this 7.62 DD5 SBR may just be the ultimate rancher gun. It’s easy to stow or carry and features a Mid-length gas system that reduces unlocking pressure as much as possible to accommodate 7.62 rounds. Can’t you see one in your truck?

Innovative 4-Bolt Connection System replaces barrel nut for increased stability and a uniform connection between the handguard, barrel, and receiver

Bolt carrier is equipped with a buffer for optimized cycling and improved recoil impulse

12.5" chrome-lined DD proprietary steel, heavy phosphate coated, S2W profile barrel for accuracy and durability. DD Liner Compensator

All new DD5 rifles feature Superfinished & DLC Bolt Carrier Groups so they are easy to clean and maintain. The patent-pending bolt carrier buffer optimizes cycling.

All DD5 rifles include the innovative 4-Bolt Connection System. Free-floating CHF barrel and handguard mount securely to the upper without a barrel nut.

User-adjustable gas block for reliable suppressed shooting

Crisp 2-Stage Geissele Super Semi-Automatic Trigger delivers precise, on-target shots

18" chrome-lined DD proprietary steel, heavy phosphate-coated, S2W-profile barrel for accuracy & durability

This hard-hitting, fast-handling rifle was built with the North American hunter in mind because it's capable of taking down any big-game animal on the continent. Chambered in three popular calibers—.260 Remington, 6.5 Creedmoor, and .308 Winchester—this long-range precision shooter helps you harvest that trophy animal you've been dreaming about. All in a semi-automatic platform with an adjustable gas block for a consistent feel shooting both suppressed and unsuppressed, and a perfected bolt carrier group that operates flawlessly in all conditions and reduces overall recoil.

4-Bolt Connection System. Free-floating CHF barrel and handguard mount securely to the upper without a barrel nut

DD5V5 HUNTER

Chambered in either 6.5 Creedmoor or .260 Remington, this hunting phenom stretches the effective range of our semi-automatic platform out to even greater distances—approaching 1,000 meters—by utilizing two of today's top short-action cartridges for long-range hunting. With an adjustable gas block allowing for a consistent feel shooting both suppressed and unsuppressed, and a perfected bolt carrier group that reduces recoil and is easy to maintain and operate in all conditions, that trophy animal in your sights won't know what hit it. But hit it you will, because this remarkable rifle is a flat-out hunting machine.

UPPER RECEIVER GROUPS

1 MUZZLE DEVICE

Manufactured from high-strength, corrosion-resistant 17-4 PH stainless steel, Daniel Defense Flash Suppressors are designed to eliminate flash associated with muzzle blast

2 FREE-FLOAT RAIL

Proprietary 4- or 6-bolt attachment to the upper receiver allows the rail system to free float the barrel, which ensures barrel harmonics are not affected during operation

3 COLD HAMMER FORGED

Intense hydraulic pressure process that forms the most accurate and longest-lasting barrels attainable

M16 BOLT CARRIER GROUP 4

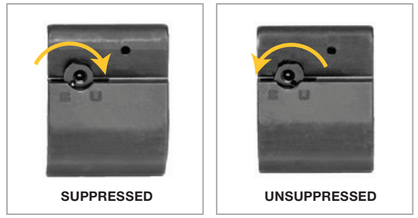

High-pressure tested, magnetic-particle inspected, featuring a shot-peened bolt and properly staked gas key

DD® UPPER RECEIVER GROUPS / They may be only part of a rifle, but our premium Upper Receiver Groups are 100% Daniel Defense. Precision machined from the finest materials at our Georgia facility, every URG comes complete with a bolt carrier group and charging handle and is ready to mount to a standard AR-15 lower. Our multiple-caliber DD5 uppers feature a user-adjustable gas block for reliable suppressed shooting. Take your AR build to the next level with these high-quality uppers available for a wide range of firearms in a variety of calibers.

OMEGA RAIL®

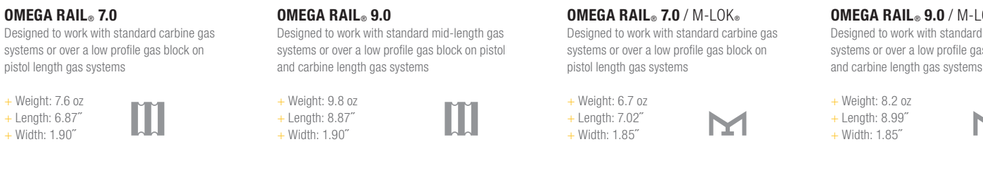

The simple-to-install Omega Rail provides a rock-solid, free-float forend with no modifications to the host rifle.

Omega Rail is specifically engineered to satisfy the intense demands of the military and law enforcement communities. This free-float option accommodates individual operator installation and requires ZERO modification to the host weapon. It also allows those who have delta ring assemblies to free float their barrel. The Omega Rail is designed to work with all commercially available M4 or AR-15 gas systems. Its exceptional strength-to-weight ratio makes it the perfect selection as a replacement for plastic handguards for your M4 or AR-15-style weapon.

- **Lightweight Free-Floating Barrel Design**
- **Easy to Install, Requires No Special Tools and No Modification to Host Weapon**
- **Uninterrupted Mil-Spec 1913 Picatinny Upper Rail**
- **Integral QD Sling Swivel Mounts with Limited-Rotation Feature**
- **Aircraft-Grade Aluminum Construction with Mil-Spec Fasteners**
- **Mil-Spec Type III Hard Coat Anodized Finish**

MFR™ RAIL

Daniel Defense MFR Rail Systems utilize the M-LOK attachment system for incredible weight savings as well as superior cooling, ergonomics, and modularity—all while maintaining the strength and durability expected from Daniel Defense. A sleek Bolt-Up System increases strength and reduces the overall diameter of the rail, making it easier to control while still utilizing a standard Bolt-Up System Barrel Nut. These versatile rail systems can be used with a pinned low-profile gas block on pistol, carbine, mid-length, or rifle length gas systems.

+ **Lightweight Free-Floating Barrel Design**
+ **Uninterrupted Mil-Spec 1913 Picatinny Upper Rail**
+ **M-LOK Attachments in 7 Different Positions**
+ **Configurable Sling Swivel Attachment Point**
+ **Patented Bolt-Up Mounting System**

+ Inside Diameter: 1.39″

MFR™ XL RAIL

Our MFR XL Rail Systems utilize the M-LOK attachment system for incredible weight savings, superior cooling, ergonomics, and modularity with no sacrifice in strength or durability. M-LOK attachment points are located along the sides and bottom on the rail, and there's an uninterrupted 1913 Picatinny rail on top. Our sleek Bolt-Up System increases strength and allows for easy installation, while an increased internal diameter gives the operator the ability to reflex some suppressors underneath the rail system. MFR XL rails are compatible with a pinned low-profile gas block on pistol, carbine, mid-length, or rifle length gas systems.

+ **Lightweight Free-Floating Barrel Design**
+ **Uninterrupted Mil-Spec 1913 Picatinny Upper Rail**
+ **M-LOK Attachments on the Sides and Bottom**
+ **Patented Bolt-Up System and Hardened-Steel Barrel Nut**
+ **1.61" Internal Diameter Designed for Use with Suppressor**

MFR™ XL RAIL 15.0 / M-LOK®
Compatible with low profile gas blocks on pistol, carbine, mid-length, and rifle length gas systems

- Weight: 10.3 oz
- Length: 9.22″
- Width: 1.90″
- Inside Diameter: 1.08″

DD® CHF BARRELS

Cold Hammer Forging (CHF) produces the most accurate, longest-lasting rifle barrels. In early 2009, after months of research and development and labor-intensive testing, Daniel Defense introduced one of the only commercially available 5.56mm Cold Hammer Forged barrels in the United States. After fine-tuning the manufacturing process and proving these barrels to be some of the most accurate and durable available, Daniel Defense introduced an entire line of Cold Hammer Forged barrels.

The process is accomplished through intense hydraulic pressure applied at opposing angles by carbide steel hammers. During the hammering process, a mandrel is inserted into the bore while the carbide steel hammers shape the barrel around the mandrel, creating the chamber, the lands, and the grooves. The Cold Hammer Forging process also changes the micro-structure of the steel, making it stronger, with a defect-free bore and the most consistent chamber possible.

All Daniel Defense barrels are Cold Hammer Forged and made from start to finish in our state-of-the-art facility located in Black Creek, Georgia. With the capacity to manufacture several thousand barrels each and every month, quality-control standards have never been more crucial. Sophisticated equipment, such as the Hommel optic, Micro-VU, and bore scope, is used routinely for complex measurements, ensuring each barrel is to spec. Daniel Defense barrels are finished with either a Mil-Spec heavy-phosphate outer finish with chrome lining or DLC coating as it pertains to the MK12 stainless steel barrel. DELTA 5 barrels are Cerakote H-Series coated.

DELTA 5® BARRELS

Our Cold Hammer Forged barrels are as accurate and long lasting as any you'll find. And you can easily switch the caliber of your DELTA 5 or DELTA 5 Pro with this barrel conversion kit. We've taken the modularity found in our ARs and adopted it for the bolt-action rifle by attaching the barrel via a barrel extension. Since the extensions are installed by us at our factory, headspace will always be correct because it is set at the time of manufacturing. To change barrels, just remove the barreled action, remove the barrel nut, install the new barrel, tighten the barrel nut to the proper torque, and then re-install the entire barrel/action assembly into the stock. With the included ½" barrel nut wrench, you can swap barrels in minutes. No gunsmith required!

GRIP-N-RIP®
AMBI CHARGING HANDLE

Heavy-duty stainless steel roll pins

Main body machined from 7075-T6 aluminum & Type III hard coat anodized finish

Compatibility:

- 5.56 – Fits all AR-15 pattern rifles
- 7.62 – Fits DD5 V3, DD5 V4, DD5 V5 and all DPMS Gen 1-length AR-10 rifles

GRIP-N-RIP® ambidextrous handles:
Each handle independently operates the latch

Lightweight enlarged ergonomic handles:
Made from 6061-T6 aluminum & Type III hard coat anodized finish

Latch is made from 6061-T6 aluminum
& Type III hard coat anodized finish

Anti-gas features:

- Ridge in back redirects gas flow upward away from the face
- Hole crosscuts bottom channel to redirect gas in a perpendicular direction away from shooter

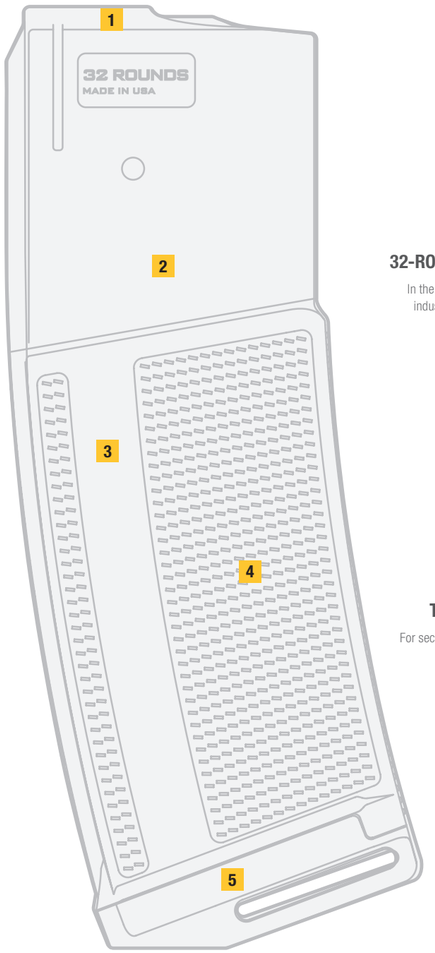

SUPERCHARGE YOUR AR

The Daniel Defense GRIP-N-RIP Charging Handle was designed and manufactured with the features and benefits to enhance every user's comfort and performance. The GRIP-N-RIP is engineered for suppressed fire. Independently ambidextrous handles accommodate left- and right-handed shooters, with each handle independently operating the latch.

Available in Black, Mil Spec +, Daniel Defense Tornado

DD® ENHANCED PISTOL GRIP

Daniel Defense's Enhanced Pistol Grip features a more ergonomic wrist angle and integrated, oversized trigger guard for strength and comfort. Soft-touch rubber overmolding gives the shooter a reliable hold in all weather conditions.

Available in Black, Mil Spec +, Daniel Defense Tornado

DD® ENHANCED BUTTSTOCK

The Daniel Defense Enhanced Buttstock is constructed of a proprietary blend of glass-infused polymers and finished off with soft-touch rubber overmolding in strategic points. It's precision formed for Mil-Spec receiver extensions, minimizing forward or lateral play. This eliminates the need for a tensioning device or friction lock. All of which results in a durable buttstock that provides a comfortable, repeatable cheek weld and unprecedented control of the firearm. The buttstock can be run with the included convex or concave buttpads or without them to accommodate the operator's gear. Limited-rotation QD swivel attachment points are integrated on both sides for ambidextrous sling attachment.

Available in Black, Mil Spec +, Daniel Defense Tornado

MUZZLE DEVICES

STRONG & DURABLE

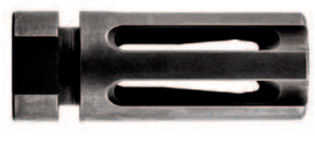

Daniel Defense offers premium muzzle device options that are designed, tested, and manufactured to meet the expectations of the most experienced shooters. In a series of tests, the Daniel Defense Flash Suppressor and Superior Suppression Device showed reduced muzzle signature over the traditional A2 Birdcage. For competition shooters demanding accuracy, the Daniel Defense Muzzle Climb Mitigator redirects propellant gasses through calibrated ports, countering both recoil and muzzle climb. Less recoil and muzzle climb results in quicker, more precise follow-up shots and reduced fatigue. In keeping with the highest standard of quality, Daniel Defense muzzle devices are constructed from the highest-grade 17-4 PH stainless steel and salt-bath-nitride finished to reduce corrosion and wear.

Daniel Defense muzzle devices are available in 1/2-28 (5.56mm) or 5/8-24 (6.8 SPCII, 300 BLK, 7.62mm) TPI. Only the Flash Suppressor and SSD come in standard or extended lengths. The standard-length flash suppressor, 1/2-28 TPI, is compatible with certain aftermarket sound suppressors.

FLASH SUPPRESSOR
+ Length: 1.875″
+ Weight: 2.27 oz.

FS EXTENDED
+ Length: 2.250″
+ Weight: 2.66 oz.

MUZZLE CLIMB MITIGATOR
+ Length: 2.125″
+ Weight: 3.21 oz.

DD® WAVE® MUZZLE BRAKE
+ Length: 2.23″
+ Weight: 3.84 oz.

NEW DELTA 5® PRO ACCESSORIES FOR '22

NEW

BAG RIDER
FOR DELTA 5® PRO & PRO CHASSIS SYSTEM

Extends surface area for contact with the rear bag. Eliminates bag hook catching the bag. Stable shooting platform and ability to move forward and backward without moving the bag.

NEW

EXTENDED PICATINNY RAIL
FOR DELTA 5® PRO

Extends length of available rail to end of handguard. One-piece design creates coaxial alignment. Allows use of forward mounted optic.

SIGHTS

A1.5® FIXED REAR SIGHT

The Daniel Defense fixed rear sight with Patented Rock & Lock technology allows for easy and secure installation on flat-top upper receivers. It is engineered to not impede use of the charging handle on AR-15-style rifles.

FIXED FRONT SIGHT

Special attention was paid to facilitate the use of a weapon light forward of this rail-mounted fixed front sight. Rear surface features anti-glare serrations. One-piece design ensures easy installation with its Patented Rock & Lock technology.

NEW

MIL SPEC +®

Daniel Defense Tornado®

MOUNTS

M-LOK® SCOUT LIGHT MOUNT

Developed for the SureFire Scout Light. Lightweight, snag-free design is compatible with M-LOK handguards and is reversible for ambidextrous use. Will securely attach the SureFire M300 Mini Scout Light, M600 Ultra Scout Light, M600P Fury Scout Light, M300V Mini Scout Light, M600V Scout Light.

NEW

M-LOK QD ATTACHMENT POINT

M-LOK QD Swivel Attachment Point is designed to allow the mounting of a popular heavy-duty pushbutton quick detach sling swivel anywhere along a handguard with M-LOK attachment. Molded from robust 4620 steel and finished with magnesium-phosphate coating to protect against corrosion and wear, the M-LOK QD Attachment Point is designed to limit the swivel's rotation to prevent twisting or tangling of the sling.

RAIL MOUNT QD SWIVEL ATTACHMENT

Mount the swivel anywhere along the rail system with the Rail Mount QD Swivel Attachment. Machined to limit the rotation of the swivel to prevent the operator's sling from becoming tangled. One-piece design increases structural integrity. QD Swivel included. Available in Rock & Lock M-LOK or Picatinny versions.

REAR RECEIVER QD SWIVEL ATTACHMENT

QD Swivel Attachment provides an ambidextrous pushbutton attachment of the popular heavy-duty pushbutton QD sling swivel. This steel-constructed swivel attachment mounts to the rear of the AR-15 lower receiver with a collapsible stock receiver extension. The swivel's rotation is limited by the buffer tube, preventing tangles.

EZ CARBINE SLING MOUNT

Attaches to any AR-15/M4 with a collapsible buttstock and Mil-Spec receiver extension. QD swivel attachment allows for ambidextrous functionality as the QD swivel can be swapped from the left attachment point to right and rotation is limited to ensure the sling does not become twisted or tangled. One-piece design allows for quick and easy installation.

MOUNTS

OPTICS MOUNTS

Get secure mounting for most standard-size scopes with our Optics Mounts. Available in single-ring and variable-power scope configurations, the mounts are precision-machined from 6061-T6 Aluminum and finished with Type III Hard Coat Anodizing. Each mount features our patented Rock & Lock technology for easy installation and removal with Torx Plus fasteners at the base and rings. Available in both 1" and 30mm.

MICRO MOUNT

Securely mount a variety of popular optics, including Aimpoint's Micro R-1, H-1, T-1, T-2; Vortex's Sparc I & II; Primary Arms' Micro Dot & Advanced Micro Dot; Holosun Technologies HS403; or any other optic using the same type of mounting method. Offers absolute or lower 1/3 co-witness with backup iron sights. Patented Rock & Lock attachment technology.

M-LOK® TO PICATINNY (MIL-STD 1913 RAIL) MOUNT

The Daniel Defense M-LOK Picatinny Rail Section is a 2.5" M1913 Rail designed to attach to an M-LOK Handguard. This part allows for the installation of any Picatinny accessory, such as vertical grips, weapon lights, and sling attachments.

BIPOD MOUNT ADAPTER

The Daniel Defense Bipod Mount Adapter is designed for use on rail systems that utilize the M-LOK or Picatinny attachment method for mounting accessories. This lightweight adapter allows users to securely attach bipods with sling swivel stud mounts. Available in Rock & Lock (Picatinny) or M-LOK versions.

1 O'CLOCK OFFSET RAIL

Optimized for mounting miniature red-dot optics or a variety of lights and accessories in the 1 o'clock (right-hand) or 11 o'clock (left-hand) positions. Patented Rock & Lock attachment technology.

RAIL PANELS

RAIL PANELS

Made for MIL-STD 1913 Picatinny rail systems, these rail panels are designed to shield your hand from excessive heat while protecting the rail system. Made from Santoprene, a material capable of withstanding temperatures up to 300˚ Fahrenheit. Will not fit KeyMod or M-LOK rail systems. Available in black and come three to a pack.
